Port of Baltimore Visitor Informational

The Port of Baltimore was founded in 1706 and is one of the leading ports in the country. The port handles containers, autos, Ro-Ro (Roll on / Roll off), forest products, project cargoes, and varying break-bulk commodities.

Ceres has been operating in the Port of Baltimore since 1979 and has built a reputation on making customer needs and requirements a priority. We handle hundreds of thousands of automobiles and RoRo cargo in Baltimore per year.

With a client base of leading RoRo ocean carriers, we handle import and export autos and trucks for Mercedes, BMW, Ford, Chrysler, Mitsubishi, Nissan, Subaru, Suzuki, Isuzu, Fuso and Toyota. Ceres handles heavy equipment from John Deere, Caterpillar, Case New Holland and other various heavy RoRo units, which include mafi and breakbulk cargoes. At the South Locust Point Cruise Maryland Terminal, Ceres handles the Port's World Class Cruise Lines, Royal Caribbean and Carnival Cruise Lines as well as their passengers.
